

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (Currently Amended) A reflective-type liquid crystal display device, comprising:  
first and second substrates;  
a reflective electrode over the first substrate, wherein the reflective electrode comprises an opaque metal;  
a liquid crystal layer disposed interjacent the first and second substrates;  
two uniaxial optical compensation films of a same type over the second substrate; and  
a first alignment layer over the first substrate.

Claims 2 and 3 (Canceled).

4. (Previously Presented) The device of claim 1, wherein said two uniaxial optical compensation films are positive-type.

Claims 5-13 (Canceled).

14. (Currently Amended) A method of manufacturing a reflective-type liquid crystal display device, comprising:

providing first and second substrates;  
forming a reflective electrode over the first substrate, wherein the reflective electrode comprises an opaque metal;  
providing a liquid crystal layer disposed interjacent the first and second substrates;  
providing two uniaxial optical compensation films of a same type over the second substrate; and  
forming a first alignment layer over the first substrate.

Claim 15 (Canceled).

16. (Previously Presented) The method of claim 14, wherein said two uniaxial optical compensation films are positive-type.

Claims 17-19 (Canceled).

20. (Currently Amended) The method of claim 14, wherein said forming a first alignment layer includes exposing said first alignment layer to ultraviolet light to form [[said]] a plurality of alignment directions.

Application No.: 08/936,510  
Group Art Unit: 2871

Docket No.: 8733.004.01  
Page 4 of 12

21. (Currently Amended) The method of claim 14, wherein said forming a first alignment layer includes rubbing a surface of said first alignment layer to form [[said]] a plurality of first alignment directions.

Claims 22-39 (Canceled).
